it sure makes sense to do both the technical and "marketing" parts together. the "marketing" parts are product oriented, not hype. people will want to know the api's in 3.1, issues like doc and printer portability, postscript printer interaction, etc. I like the idea of doing it after beta 2.

ha ha ha ha ha...

kala, please make sure this request doesn't get filled.

Subject: BETA REQ: Digital Research, Inc.

Date: Fri Aug 02 14:48:26 PDT 1991

Customer: Digital Research, Inc.  
UK Address: No address available for UK site.

US Address: 70 Garden Court  
Monterey, CA

Contact: John Constant  
Telephone: 44 (0) 488 684587  
FAX: 44 (0) 488 683135

Digital Research would like to become a beta site. They would like to enable their operating system to support Windows 3.10. Specifically they need to modify the LoadHi.VxD (now part of VMM) allowing their memory manager to function correctly.

NOTE: John Constant would like to be contacted by telephone as soon as possible.

Date: Fri, 02 Aug 91 15:53:14 PDT

thomasf has been going through the win386 code and has noticed some places where he doesn't think they've set up critical sections right or worked through some of the cases; and suggests that someone like zibbo do a good code review. sounds like a good idea to me..

I want to close on a dos dev lead. My first choice is paulc. Honestly, I'm a bit uneasy about nigelt.
